

les éclaireurs

Les éclaireurs are looking for a junior lighting designer lighting designer

Les éclaireurs is a lighting design and lighting agency with a **plastic and technical approach**.

Our office has solid experience in the contemporary lighting enhancement of public spaces with a high image impact, urban complexes and public parks. The company is characterised by a scenographic approach to space, creating urban wanderings, making the space legible, playing with the temporalities of the city and its uses to better support them.

The agency benefits from a solid experience in **architecture, scenography / mueography, and road structure**, with very simple, energy-saving and maintenance-friendly lighting designs. For each of our projects, we work with lighting effects that are integrated into the architecture and develop a sensitive and poetic approach to light.

Finally, the company is distinguished by its **complete command of lighting engineering**.

The team is young and dynamic, composed of 10 lighting designers and 2 people in charge of development. Each designer is a project manager, with privileged fields of competence.

Job :

- junior lighting designer, 0 to 2 years experience;
- CDI 35 hours, trial period of 1 month renewable;
- Applicable collective agreement for design offices IDCC 1486;
- "ETAM" post, according to experience and skills;
- Salary according to the agency's grid and the collective agreement.

Missions :

- Under direction of project leaders, develop lighting projects and create interior and exterior lighting concepts: highlighting of monuments, lighting of tunnels, structures, infrastructures, museums, public buildings, exhibitions, street lighting, squares, etc;
- Under direction of project leaders, design the electrical networks and associated civil engineering;
- Follow the company's public and/or private contracts from the design study phase to the completion monitoring phase;
- Write the production files;
- Follow-up of sites and business from France;
- Possibly follow up on foreign projects in English and travel when needed;
- Night and daytime settings of headlights;
