

Urban Garden restaurant

(Lyon, France)

Urban Garden is an office complex located in Gerland district in Lyon. It is designed as a real alternative to the Part Dieu business district, with a contemporary, fluid and refined architecture signed Valode et Pistre. Working for the interior designers of the Partie Commune agency, we are in charge of the lighting for the restaurant in the Urban Village service center. The luminous atmosphere gives a unique undergrowth lighting identity. The lighting

of the main dining room accompanies the users in a very special wandering and experience. This project is part of an environmental approach associated with BREEAM certification. © Partie Commune
