

raw materiality, punk attitude

(Rotterdam, Netherlands)

Experimental hotel of Nh group, based on a deliberately unusual concept, Nhow Rotterdam completes the series opened in Berlin and Milan. Upon the request of OMA, we design a lighting of a certain brutality: stage projectors equipped with LED for circulations, big stage projectors for the main hall, luminous circles suspended directly to the steel mesh of the ceiling, big signage box

made of steel and letters as a New York advertisement in the lobby, etc. The project uses a subtle cameo of white light, and a few touches of warm and cold lights. All the programming was done by us.
