

Renovation of the Haras and creation of the Animation Cinema Centre (Annecy, France)

The former Haras of Annecy (Stud Farm) located in the heart of the city has been transformed to accommodate the new Animation Cinema Centre in Annecy, but above all to become a place for the inhabitants of Annecy to live, exchange and meet (creation of a gastronomic hall, a new exhibition area, a park open onto the city...). The lighting project accompanies the main elements of the project. The lighting of the façades reveals the exceptional architecture

of the buildings, which are reflected in the water mirror. The pond and its water features, located in the heart of the stud farm, are subtly and naturally underlined by the light, while the park, restored and replanted, remains in the shade to preserve its biodiversity. © DDA Devaux and Devaux Architects & ARTEFACTORY
