

An emblematic monument in the city centre of Algiers

(Algiers, Algeria)

The Grande Poste of Algiers, designed by French architects Jules Voinot and Marius Toudoire, is an emblematic monument, a true reference in the centre of the capital. We have illuminated this sumptuous building with dynamic LED lighting controlled by DMX, in order to adapt it to the intense activity that punctuates this nerve centre. In addition to the design, we ensured the follow-up of the realisation and the DMX programming.

This project, designed as plug-n-play, was delivered in record time.
