

Innovative and economical solutions for the largest hospital facility in Europe (Pointe à Pitre, Guadeloupe island)

Lighting design and lighting engineering for Europe's largest hospital under construction with over 77,000 sq m of indoor spaces and 150,000 sq m of landscape. Patient health, caregiver comfort, lighting and guidance, energy savings...these are just some of the topics developed in this complex project, where we provide lighting for all the rooms and outdoor spaces.

A project developed in deep relation with Architecture-Studio, Babel, l'Agence and Ingerop.
