

## A hundred meters tensed bow, visible from the sea

(Le Précheur, la Martinique island)

Following the tropical storm that caused a devastating torrent of mud in 2010, reconstruction of the bridge that connects the two sides of the town of Le Précheur. A tensed bow creates a discrete sign in the tropical landscape, at the bottom of the volcano «montagne Pelée». With simple LED projectors hidden in the bow of the bridge, and two poles on each side, we light the road. The bow itself is illuminated in subtle colors.
