

A haven for nature in the city center

(Strasbourg, France)

In the heart of Strasbourg, the Heyritz park is a haven of biodiversity. We offer a soft atmosphere to the wanderings of the park with presence detection lights that are complemented by spotlights highlighting some remarkable trees. The central square and its water games are enhanced by needle poles and cut-out games. The large sports plain is bathed in a bluish tint while the paths

are lit in warm white. At the water's edge, signposts accompany the walker, while a few alcoves are lit.
