

Port Vauban

(Antibes, France)

The major renovation project of the Port Vauban in Antibes is led by the agency AAPP - Philippe Prost. This exceptional port welcomes the largest yachts in the world as well as the «pointus» of local fishermen. This large-scale urban project aims to create a high-quality, sober and elegant port environment. It is part of a global approach to the enhancement of public spaces, a framework for

exceptional nautical activities and a powerfully attractive historic heart. With the Prost team, we are carrying out the lighting of the Quai des Milliardaires, the Old Port, the Anse St Roch, the Marina and its shipyard. © Fred Laurès
