

## Artistic and technical direction of the light plan of Orléans city (Orléans, France)

Consultant mission, artistic and technical advices within the lighting Masterplan of the city of Orléans from 2012 to 2015: Modernize and develop the lighting masterplan for its implementation during the various programs of requalification of public spaces in the city; ensure the quality and coherence of the night-time atmosphere; provide technical solutions in compliance with the commitments made in the framework of Agenda 21; advice and technical

support to merchants; elaborate global solutions, in terms of investment and operation. The perimeter of intervention concerns the different sectors of the city included in the intra-mail, and the whole of the remarkable points that can count the city (spaces and public facilities, cultural and religious sites, various buildings...). This mission applies to street lighting, facade lighting and festive illuminations.
