

Three squares to revitalise the commercial activity of the city center

(Caluire, France)

Given the opportunity of a new footbridge over the Rhone, between St Clair district and the International business center of Lyon, the city of Caluire try to reinvigorate the district's commercial image, through the urban renewal of three strategic squares. Our proposition creates a patrimony parcours and an artistic pathway around the international artist Peter Downsborough. After designing a

lighting master plan, we develop the lighting of the three squares : cold squares of light on the asphalts, lighting of stairs, lighting of the blind façades with the sculptures of the artist.
